

Position. Storage. Movement

Engineered to optimise space, overcome logistical challenges, and enable point-of-use disposal, the Cleanaway Daniels suite of clinical products and accessories are designed as an end-to-end solution, providing safe and seamless transitions between different work environments and applications.

The three signature designs exclusive to Cleanaway Daniels which enable logistical versatility and space optimisation are the Cleanaway Daniels peg system, mounting bracket and rail locks. These three systems form the genesis of all our accessory designs.

Peg System

Mounting Bracket

Rail Locks

Our interchangeable Sharpsmart & Accessory systems are designed not only to achieve optimum versatility but also to champion safe handling for hospital staff and reduce the risk of infection. All of our mounting and logistical accessories ensure that Sharpsmart collectors are always suspended from the ground, and the maneuverability of our transport accessories take the risk out of waste handling.

The Cleanaway Daniels Sharpsmart collectors are not just a sharps waste receptacle, they are part of an engineered risk-averse solution that manages waste from cradle to grave with the highest safety and environmental standards ever evidenced in the medical industry.
